

# UPS SurePost<sup>®</sup>

## A B2C Economy Solution that Beats the Competition

UPS SurePost provides an economical, easy-to-use shipping solution for Unishippers customers' lightweight, low-value and residential and commercial shipping needs.

### UPS SurePost is a smart solution when your shipments:\*

Are primarily B2C and bound for a residential and commercial address

Are small and lightweight — generally less than 10 lbs. in weight or one cubic foot in size

Have a low economical value and requires limited liability coverage

Don't require urgent or guaranteed delivery times

With UPS SurePost, you don't have to compromise quality for cost, either. It beats the other competitive postal solutions with:

#### Consistent time-in-transit

Although not a guaranteed service, you can easily estimate and communicate delivery times to your customers knowing that UPS SurePost's time in transit is 1-5 days with roughly 75% delivered within 3 days (or UPS<sup>®</sup> Ground plus one to two days) in the 48 contiguous U.S. states, where the service is available.

#### Integrated shipping & tracking

With the convenience of preparing UPS SurePost shipments alongside your other small package shipping on UPS's systems, plus the ability to track packages with any UPS tracking tool, UPS SurePost adds transparency for your customers and simplifies your shipment creation process.

\*This is not a guarantee of service. Availability of and eligibility for UPS SurePost will depend on certain qualifications, including shipment volume, approval by UPS and other factors to be addressed by your Unishippers representative.
